GOAL

I desire to be employed in a positive, encouraging environment where my skills will be used to help further the craft beer industry.

SUMMARY

I am an impassioned environmentalist with a Bachelor of Arts degree in Environmental Studies from UC Santa Cruz. I produce MicroBrewr, a weekly podcast about how to start a brewery. I also blog about my pursuit to start a brewery in the Monterey area. I am trained in Responsible Beverage Service (RBS) and am currently studying for Cicerone® Certified Beer Server. In addition to being a published writer, I have demonstrated qualities of leadership.
